

Thomas Moore

206-771-0201 | Chester, VA | tmoorecd@gmail.com | [Linkedin](#) | [Github](#)

Quality-oriented Full-Stack Software Developer with proven leadership, problem-solving, and teamwork skills. Frequently praised as hard-working by my peers, I can be relied upon to successfully fill the Software Developer role at your company

TECHNICAL SKILLS

[Languages] JavaScript(ES 6), Node.JS, CSS, HTML, Java, Python **[Libraries/Frameworks]:** React, Mongoose, Socket.io, Bootstrap, Spring MVC, Spring Data, Java Persistence API (JPA), Spring Rest, Spring Boot, Flask, Express **[Databases]:** MySQL, MongoDB **[Tools]:** Visual Studio Code, Spring Tool Suite (STS), Github, Git, Postman

PROJECTS

Facebook Clone | Team Leader | Ongoing

- Leading a team of six developers in order to create a clone of the Facebook desktop and mobile site.
- Practicing, utilizing, and teaching agile development and version control.
- Conducting team building activities to improve collaboration, discover strengths, motivate developers, and inspire ideas.

Otter | Full-Stack Developer | [Github](#) | Ongoing

- Creating a social media application that allows users to share, manage, and interact with posts and connect with other users
- Designed and implemented a RESTful API enabling posts, users, messages, and comments to be stored persistently in a SQL database.
- Integrated Google Identity Services Library and the Apple JS Framework to enable delegated authorization for users.
- Utilizes Spring Boot, Spring MVC, Spring Data (JPA), React, Apple JS Framework, Google Identity Services Library, HTML, CSS, JavaScript, Bootstrap, Axios, SQL, Socket.IO

ChatRoom | Full-Stack Developer | [Github](#)

- Built a website that allows users to create and join “rooms,” have live chats with others, and modify their profiles
- Created a mobile-response front end with React, JavaScript, and HTML/CSS
- Integrated real-time, low-latency communication between users by employing Socket.IO
- Optimized with Asynchronous API calls to improve user experience
- Utilized MongoDB, React, Express, Node.JS, Socket.IO, AWS EC2, Nginx, JavaScript, Axios, Bootstrap, HTML/CSS

MoonBow Pet | Full-Stack Developer | [Github](#)

- Created a website from scratch that includes login and registration, connects to a SQL database, allows users to purchase, view, and manage virtual pets, and allows users to add friends and view their profiles and pets.
- Utilized SQL, Flask, Python, AWS EC2, HTML, CSS, JavaScript, Bootstrap

EDUCATION

Coding Dojo | *Full-Stack Developer Certificate* | Remote

2022

- Immersive Full-Stack Training Program in Python, Java, and MERN (MongoDB, Express, React, Node.js)
- Achieved a “triple black belt,” which is considered the camp’s highest achievement and displays mastery in all of the subjects taught
- Worked 100% remotely with dev students from all over the country

New River Community College Cybersecurity I

2020-2021

Shoreline Community College Computer Science II: Data Structures With Java

2019-2020
